

SME Impact Certification Report

Issued by: Re-Source Sustainability Division
Date: 19 October 2025
Certificate ID: SC-2025-1019-004
License Type: SME Circular Economy Certification

Company Overview

Company Name: Versatile Global Trading
Trade License ID: [TRD-****-AE]
Location: Dubai, United Arab Emirates

This report certifies that **Versatile Global Trading** has actively participated in the **Re-Source** business-to-business surplus exchange platform, contributing to the **reuse and circular redistribution** of materials, machinery, and other business assets.

By contributing to this initiative, the company supports the **UAE’s long-term sustainability** and **Net Zero 2050 climate vision**, fostering responsible production and consumption practices among small and medium enterprises (SMEs).

Environmental Benefit Breakdown

➤ The above metrics were calculated using Re-Source’s standard impact assessment methodology.

Metric	Measured Impact	Description
Total Items reused	328 Units	Surplus items, equipment, and materials successfully transferred and reused by other businesses.
Total Waste Diverted	2460 Kg	Approximate quantity of waste prevented from entering landfills or recycling streams through reuse.
Estimated CO2 Reduction	4.1 Tonnes	Equivalent emissions prevented through avoided manufacturing, logistics, and disposal processes.

Waste Diversion (kg):
Estimated based on the average mass of reused items logged through Re-Source’s digital traceability model.

CO₂ Emission Reduction:
Based on the UNEP factor of **1.67 kg CO₂ saved per kg of material reused** through avoidance of production and disposal.

Formula used - **Total Waste Diverted (kg) × 1.67 = CO₂ Reduced (kg)**

Certification Summary

This certification acknowledges the company's role in advancing sustainable industrial practice through:

- Diverting usable items away from waste streams.
- Enabling cost-effective procurement for other businesses.
- Reducing environmental footprint within UAE's SME ecosystem.
- Supporting the UAE Vision 2031 sustainability targets.

Relevant SDG	Description of the SDG
SDG 9: Industry, Innovation and Infrastructure	By reusing industrial assets to strengthen the local supply chain.
SDG 12: Responsible consumption and production	By adopting surplus item reuse as part of business practice.
SDG 13: Climate action	Through reduction of CO2 emissions and waste.

Verification

This report has been generated using verified data from Re-Source's platform database and transaction logs. All figures are derived from digitally recorded transactions conducted between **January 1st to February 1st**.

Certificate Holder: Versatile Global Trading

Authorized Signature: 

This certification is issued under the Re-Source's SME Circular Certification Program (SCCP).

- Figures are rounded to the nearest whole number.
- Continued participation and data submission are **required for renewal**.

Summary Statement

By collaborating with Re-Source, your company has not only reduced operational waste but also actively contributed to a greener and more sustainable UAE economy.

This certification stands as evidence of your commitment to responsible business practices and environmental stewardship.
